

## Greenpower Installations Ltd

### ENVIRONMENTAL POLICY STATEMENT

GreenPower Installations Ltd is committed to managing its activities in a way that seeks to safeguard the interests and concerns of all shareholders, customers, employees, business partners and the general public.

GreenPower Installations Ltd recognises that its activities have an effect on the environment and that care for the environment and continual improvement in environmental performance are fundamental to business success. GreenPower Installations Ltd therefore seeks to minimise the environmental impact of design, specification, procedures, and contracting operations within our control.

In pursuit of this, GreenPower Installations Ltd will:

- Meet all applicable legislation, government guidelines, and industry codes of practice.
- Continually review its activities to ensure a programme of continuous improvement and minimise any environmental disturbance and the prevention of pollution by construction or related activities.
- Implement this policy throughout all of its operations through documented environmental management systems. These shall incorporate appropriate objectives, targets, standards and procedures which will be regularly reviewed and revised.
- Wherever possible, make efficient use of natural resources by minimising waste, conserving energy and, water and promoting recycling and the use of recycled materials.
- Incorporate consideration of environmental issues into commercial decision-making, in particular to new developments, projects and acquisitions initiated by GreenPower Installations Ltd
- Promote environmental awareness, understanding and individual responsibility amongst staff through training and other initiatives to ensure that their working activities are carried out in line with the Environmental Policy.
- Make clients, designers, contractors, subcontractors and major suppliers aware of this policy and that they should apply compatible environmental standards.

- Implement site-specific environmental management plans for construction activities and ensure that any environmental impacts identified in the plan are eliminated or reduced to an acceptable level.
- Respect the environmental quality of the locations in which work is carried out.
- Publish an annual environmental performance statement.
